## (54) MONITORING CONTROLLER

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a monitoring controller which can easily produce a monitor screen and also excels in the monitoring capability by giving a function to each of symbols which are used for the monitoring screen to connect and associate with each other.

SOLUTION: This controller includes a drawing control means which displays the symbols on a monitoring screen 4, a relevant object 30 having a 1st data acquiring means which acquires its own process data from a data source 60 storing the process operation information and a data output means which outputs the process data acquired by the 1st data acquiring means and an instrument object 20 having a 2nd data acquiring means which receives the process data outputted from the data output means of the object 30, an arithmetic means which processes the process data into the display data and a display means which shows the display data on the screen 4.
